

Custom Woodworking & Installations

Based on our build-to-print capabilities, our carpenters make specialty wooden cabinets, doors, and tables for area businesses as part of our industrial building projects.

Further, our internal woodworking shop builds and installs custom-made cabinets for all our mobile medical coaches and trailers for our division, Armor Mobile Systems.

We serve other non-industrial businesses by designing and building custom woodworking products.

We have the capability and operations to support home builders, property renovation firms, construction companies, medical offices, nursing homes, retail, and general office environments.

Our woodworking shop is based in our Mason, OH, manufacturing facility.

Below is a partial list of our equipment

- Holzma Beamsaw HPP 81/38
- SMCI SW15 Sliding Table Saw
- Laguna Jointer
- Powermatic Shaper
- Powermatic Planer
- Box Truck for deliveries
